About the private – public – partnerships events:

Events in Kosice and Uzhgorod are planned after having the results of the extensive desk research on identifying funding opportunities available for young entrepreneurs coming from both public and private programs. Moreover, best practice in the mapped countries was analyzed and summarized. Purpose of these events is to make young scientists fostering entrepreneurship aware of the existence of these programs and analyze how best practice from Western regions can be adapted to current situation in Eastern Danube region and which is more suitable instrument for this. Both events aim to bring new ideas on funding projects to the less developed economies of Danube region. Nice drinks and food, specific to the country in which the event will take place, will support synergies between participants and deeper knowledge to the tradition of the countries involved.
